Implementation and Evaluation of Zero-Knowledge Proofs of Knowledge

The objectives:

1. Investigation of current algorithms

2. Investigation of specification-to-HDL framework

3. System implementation

Milestones:

1. Theoretical study done - 1st week of November

2. Investigation of current algorithms done - 1st week of December

3. Investigation of specification-to-HDL compiler done - 1st week of January

4. System implementation done - 1st week of February

5. Thesis text done - 1st week of February

	Sep	Oct	Nov	Dec	Jan	Feb
Theoretical study						
Investigation of current algorithms						
Investigation of specification-to-HDL compiler						
System implementation						
Thesis text
